

DECK ARMOR™

Series by Creative Polymers

**SAFETY SURFACING FOR SPLASH PADS,
WATER PARKS & AQUATIC AREAS**

DECK ARMOR™

Series by Creative Polymers

The **DECK ARMOR™** product line is a series of systems designed to address a variety of non-slip, decorative and chemical resistant requirements. All the systems are based on polyurethane technology and have been specialized for the flooring and water park industry. They provide high color retention and excellent resistance to wear, UV and chlorine.

KEY FEATURES:

- Applies to most surfaces including asphalt
- Cooler underfoot
- Softer underfoot
- 100% resistance to UV degradation & fading
- Excellent slip-resistance wet & dry
- Ability to create beautiful designs & logos
- Chlorine resistant
- Fungal resistant

Fungus Resistant

High Chlorine Resistance

Long Term UV Resistance

Outstanding Abrasion Resistance

Ultimate Color & Gloss Retention

Superior Stain Resistance

Why DECK ARMOR™ Outperforms The Competition

DECK ARMOR™ is a series of specially formulated systems to resist attack from chemical and chlorine environments. Most competing systems fail due to repeated chemical attack. Our systems have been made and tested to survive in these tough areas along with severe UV and abrasion resistance. All products incorporate anti-slip performance and safety.

THREE UNIQUE SERIES FOR A WIDE VARIETY OF APPLICATIONS!

Product	DECK ARMOR I	DECK ARMOR II	DECK ARMOR III
Product Type	Solvent Based Aliphatic Urethane	Water Based Aliphatic Urethane	Solventless/Solvent Based Aliphatic Polyurethane
Description	Hard Coating	Rubberized System	Elastomeric System
Components	2 Component	1 Component	2 Component
Flexible	No	Yes	Yes
Non-Slip Additive	Micronized Polymer	Crumb Rubber Granules	Decorative Colored Soft Beads
DIY	++	++++	+

Deck Armor™ I

Two Component Aliphatic Polyurethane Non-Slip Floor System

A high performance aliphatic polyurethane for floor and deck coating used in interior and exterior water park and theme park applications, used where superior color, UV and wear resistance is paramount. Deck Armor I is extremely chemical resistant to chlorine and other chemicals and provides an anti slip, scuff resistant surface for long term performance.

Key Advantages

- High Wear Resistance
- Chemical Resistance
- Exterior & Interior
- Non-slip Additive Available

Applications

- Safety Flooring
- Locker Rooms
- Platforms
- Bulkheads
- Bathrooms
- Splash Pads

Recommended Surfaces

Concrete • Wood • Metal • Fiberglass

Deck Armor™ II

Flexible Polyurethane with Rubber Additive

A decorative, single package flexible coating system that incorporates rubber granules for non-slip properties and provides a softer feel to. The system is based on a flexible, water-based color and gloss retentive polyurethane coating system. It is easy to apply with a roller or hopper spray gun and is available in a wide variety of bright colors.

Key Advantages

- Non-Slip
- Single Package
- Water-Based System
- Easy To Apply
- Flexible System

Applications

- Water Play Areas
- Walkways
- Platforms
- Steps
- Splash Pads

Recommended Surfaces

Concrete • Wood • Metal • Fiberglass • Asphalt

Deck Armor™ III

Decorative Polyurethane Bead System

A multi-step system with decorative rubber beads. The Deck Armor III system is installed by rolling out a thin layer of durable elastomer to the approved surface and over saturating with POLYSOFT round decorative rubber beads. The system is typically topcoated with a final clear aliphatic polyurethane to lock in the beads. Deck Armor™ III provides a totally monolithic elastomeric protective membrane over the substrate and can bridge cracks and irregular surfaces.

Key Advantages

- Unlimited Design Capabilities
- Exterior & Interior
- Wide Range of Bead Colors
- Provides Non-Slip

Applications

- Splash Pads
- Pool Decks
- Locker Rooms
- Platforms
- Steps

Recommended Surfaces

Concrete • Wood • Metal • Fiberglass • Asphalt
